

Backup and restore mobile phone contacts

SIMBackup™-500

The mobile phone has become an essential communication tool often containing valuable contact names and numbers. The SIMBackup™-500 is a mobile phone accessory, backing up the valuable data stored on the SIM card of your GSM mobile phone. The saved electronic copy can then be restored to a new SIM card when the phone is stolen or lost, saving the time and hassle of inputting all the numbers manually. The SIMBackup™-500 is also very handy for anyone that changes their mobile phone regularly, from kids to business users.

Storing data from 2 different SIM cards or 500 contacts, the SIMBackup™-500 reduces the need to buy multiple backup devices. It is light and has a very user-friendly, intuitive interface. The SIMBackup™-500 lets you backup and restore the data quickly, acting as an additional insurance against losing valuable data.
