

MediaHub™ (TA-7000) AVI Guestroom Port Relocator Technical Fact Sheet

The MediaHub™ allows for the relocation of guestroom audio/video connection ports to a more accessible place. Guests bring portable computing, audio, video and gaming devices with them on business and leisure travel. The MediaHub™ allows guests to take advantage of the In-Room Entertainment System by providing a simple connection hub for their iPod®, MP3 and DVD players, PlayStation®, Xbox®, laptop video output, digital and video cameras. The MediaHub™ lets guests plug-in and play through the IRES without disconnecting any of the current cabling setup, avoiding costly engineering calls for disconnected A/V cables or damaged connectors. Installation is as simple as the guest interface.

MediaHub™ Technical Features and Benefits

- Provides simple relocation of common audio/video connection ports
- Discourages disconnection of existing wiring
- Optional adhesive mounting solutions available for IRES connections
- 3.5mm stereo plug presented as a retractable cable for connecting to iPod's, MP3 players, laptop headphone jack
- 3.5mm socket to accommodate guests own 3.5mm audio cables
- iPod® dock connector male plug on a pull through cable for audio and video (will not power or recharge iPod®)
- 2 x RCA phono socket for use with video display devices (video cameras/players and game systems)
- S-Video for various video sources to HDTV displays
- Video and audio cables available separately
